

ARKIL A/S

- QUALITY ON TIME

The Arkil Group is a Danish player in Northern Europe within road building, civil engineering, construction, and general infrastructure projects.

The company was founded in 1941 and has 2,000 employees and a revenue of around DKK 3.6 billion, of which more than 35% originates from sales outside of Denmark. The main activities are in Denmark, Germany, Ireland and Sweden. The company is a family owned business in 3rd generation.

Arkil's team of highly specialised engineers and technicians perform all varieties of traditional construction works, from cable laying to site development, main sewers, motorway and railway construction as well as bridge building and other heavier concrete works.

Arkil produces and lays asphalt from a total of 14 asphalt plants in Denmark, Germany and Ireland and is a market leader in Denmark within long-term servicing and maintenance of public roads.

Among Arkil's many competences are foundation and marine works as well as tunneling activities; a field within which our German subsidiary Arkil Spezialtiefbau are specialists having the manpower, tunneling equipment and skills to solve big and complicated climate proofing jobs both on regional and international markets.

CORE COMPETENCES:

- Roads
- Asphalt
- Sewer/water pipe projects
- Bridges
- Foundation / marine works
- Road maintenance and outdoor facility management
- Environmental technologies
- High voltage cable works
- No-dig technology
- Tunneling
