

ZÜBLIN A/S

– GROUND & CIVIL ENGINEERING

ZÜBLIN A/S is a Danish construction company with thorough technical knowhow and international strength. We complete large and often spectacular construction projects together with civil and ground engineering works that are characterised by a high degree of complexity.

We are part of STRABAG, one of the leading European technology groups in the construction industry. STRABAG has over 75,000 employees and a yearly output volume of more than EUR 16 billion. The Group provides us with a strong financial base and the opportunity to draw on international expertise from 1,900 specialists in our innovative technical division and competence centre.

We believe in open and trustworthy cooperation through early involvement, and we enter into committed and trustful partnerships. Our employees work in teams and exchange knowledge across borders. As part of this network of international units, we offer turnkey solutions of the highest quality – from design and planning to execution and operation.

ZÜBLIN – TEAMS WORK.
