

# COWI A/S

## - CREATING COHERENCE TOGETHER

In the coming decades, societies have to prepare for 2.5 billion more people living in cities, while adapting to and not adding to climate change. This calls for new sustainable solutions.

At COWI, we have 90 years of experience within engineering, economics, architecture and environmental science. By combining our experience with insights from our customers and business partners, we co-create solutions enabling societies to tackle these challenging megatrends.

Our 360° approach revolves around creating value financially, environmentally and for the people using the solutions we provide.

COWI is a Danish rooted company with a global footprint. We promote knowledge sharing and collaboration amongst our 7,000 employees to foster innovative ideas and ensure that valuable insights are transferred into our solutions enabling our customers to achieve their goals.

Being an unlisted company with a strong financial foundation, COWI is able to continuously invest in partnerships, people and growth, ensuring that COWI remains an attractive employer and partner of choice.
